

GHG forecasting, roadmaps and target setting

Verco provides a range of services to help you understand your decarbonisation options, engage with stakeholders and build the foundations for credible transition planning.

These steps are usually taken when starting to develop a climate strategy for the first time, or during periodic reviews.

[Contact us to find out more](#)

GHG forecasting

Develop long-term forecasts as precursors to setting group targets, or operational forecasting for individual emission sources.

Roadmaps

Identify the routes to decarbonisation, assessing the costs, benefits, risks and opportunities.

Target setting

Explore target setting options, establishing internal consensus and obtaining external validation e.g. to the SBTi standards.
