

# GHG verification and assurance

Legislation, standards, and benchmarking schemes are all pushing toward increasing coverage and levels of assurance of GHG emissions data. Sustainability criteria attached to green loans and remuneration packages can provide another driver for ensuring reliable non-financial data.

We provide a robust, methodical, and transparent service for climate-related disclosure, which identifies areas of improvement.

## Our assurance-related services include:

- Pre-assurance / assurance readiness checks
- Assurance of utility and GHG data against primary evidence in line with ISO standards
- Verification of GHG accounting methodology to ISO 14064-3
- Reviews of climate risk and materiality exercises
